EDUCATION

DePauw University | Greencastle, IN

Expected May 2027

Bachelor of Arts in Computer Science and Business Analytics | GPA: 3.78/4.0

Awards: Merit Scholarship & International Grant (\$176,000 over 4 years)

Relevant Courses: Data Mining, Regression with Microdata, Econometrics, Artificial Intelligence, Data Visualization, Database & File Systems, Data Structures, Discrete Mathematics

PROJECTS

2026 NCAA Men's Final Four Analytics Challenge — 3rd Place, Undergraduate Division (198 Teams, 15 Universities)

- Placed 3rd nationally among undergraduate teams by designing a two-step predictive system using XGBoost and CatBoost to replicate NCAA tournament selection and seeding across 1,350+ team-season observations integrated from KenPom, ESPN, and NCAA data sources
- Engineered 40+ features, including résumé-based metrics, Pseudo-Elo ratings, and committee-like interaction terms; achieved 98.01% ROC-AUC on tournament selection and RMSE of 5.33 seeds on seeding, validated using GroupKFold cross-validation by season to prevent data leakage
- Applied SHAP analysis to reduce the feature set to the top 25 predictors and built interactive Tableau dashboards with dual-axis visualizations and paired scatter/box plots to communicate findings to a panel of technical and non-technical judges

Motherhood Wage Penalty Analysis

- Analyzed 21,000+ observations from IPUMS CPS census microdata using Stata to investigate wage disparities between mothers and non-mothers through OLS and weighted regression models
- Applied econometric techniques, including survey weights (ASECWT), robust standard errors, and demographic controls; findings showed no statistically significant wage penalty after controlling for education, experience, and occupation

Inventory Management Database System | Collaborated with 3 peers

- Designed and implemented a PostgreSQL database for retail inventory management with a normalized schema (3NF), 8 interconnected tables, and referential integrity constraints ensuring data consistency across customer accounts, orders, products, and returns
- Developed 6+ SQL stored procedures and user-defined functions, including automated reward tier calculation (Bronze/Silver/Gold/Platinum), order weight computation, and complex views for customer activity tracking and high-value order analysis

EXPERIENCE

Possible Career Accelerator | Remote

Jun 2025 - Jul 2025

- Selected as 1 of 50 faculty-nominated students across the Great Lakes College Association for a 5-week tech industry accelerator featuring live daily sessions with industry professionals across Data Analytics, Product Management, Software Engineering, and Operations
- Applied INDEX/MATCH and REGEXEXTRACT in Google Sheets to process 1,600+ scraped Instagram profiles, filtering ~780 student athletes to 32 candidates via a simulated fitness app influencer marketing brief

Volleyball Club President | DePauw University

May 2025 - Present

- Lead club operations and player development for a 30-member team, maintaining membership levels despite the graduation of core players, while implementing competitive restructuring with additional practices and skill-specific training
- Coordinated tournament logistics and team strategy, securing the tournament championship with a rebuilt roster of less-experienced players

Resident Assistant | Housing and Residence Life, DePauw University

Aug 2025 - Present

- Support a community of 51 upperclassmen residents through programming, conflict resolution, and on-call crisis response
- Manage facility operations, budget allocation, and community standards enforcement

SKILLS

Programming: Python (pandas, scikit-learn), SQL (PostgreSQL), Stata, Java, C++, Rust

Analytics & ML: Regression Analysis (OLS, Logistic, Weighted), SHAP, Machine Learning, Econometrics, Hypothesis Testing, Predictive Modeling

Tools: Tableau, Git, Microsoft Office Suite

Database: Schema Design & Normalization, Stored Procedures, Query Optimization, ER Diagrams
