EDUCATION

DePauw University | Greencastle, IN

May 2027

Bachelor of Arts in Computer Science and Business Analytics

GPA: 3.74/4.0

Awards: Merit Scholarship & International Grant worth \$176,000 for a 4-year award

Relevant Courses: Regression with Microdata, Advanced Data Visualization with Tableau, AI, Database & File Systems, Algorithmic Foundations

PROJECTS

European Football Performance Analysis: Statistical Predictors of Success

- Analyzed 13 years of European football data using OLS and logistic regression to identify predictors of team success; built 5 interactive Tableau dashboards visualizing player and team performance metrics
- Validated statistical significance of possession and shot accuracy as key predictors using hypothesis testing, with models achieving an R^2 of roughly 0.57 in predicting championship outcomes

Motherhood Wage Penalty Analysis

- Analyzed 21,000+ observations from IPUMS CPS census microdata using Stata to investigate wage disparities between mothers and non-mothers through OLS and weighted regression models
- Applied econometric techniques, including survey weights (ASECWT), robust standard errors, and demographic controls; findings showed no statistically significant wage penalty after controlling for education, experience, and occupation

NFL Passing Analytics Using Player-Tracking Data | Collaborated with 2 peers

- Analyzed NFL Big Data Bowl player-tracking data (396,796 observations) using OLS and logistic regression to evaluate route effectiveness, finding Post routes gained 8.4 additional yards on average compared to the lowest-ranking route, while Cross routes provided the best balance of completion rate and yardage
- Created interactive Tableau visualizations mapping player movements and route success rates across 12 route types

EXPERIENCE

Possible Career Accelerator | Remote

Jun 2025 - Jul 2025

- Selected as 1 of 50 students nominated by faculty for a competitive tech industry career accelerator, networking with 25+ industry professionals across Software Engineering, Product Management, Data Analytics, and Operations
- Completed technical projects, including prioritizing new features for communication software and analyzing client data to derive actionable insights

Volleyball Club President | DePauw University

May 2025 - Present

- Lead club operations and player development for a 30-member team, maintaining membership levels despite the graduation of core players, while implementing competitive restructuring with additional practices and skill-specific training
- Coordinated tournament logistics and team strategy, securing the tournament championship with a rebuilt roster of less-experienced players

Resident Assistant | Housing and Residence Life, DePauw University

Aug 2025 - Present

- Foster an inclusive community for 51 upperclassmen residents through programming, conflict resolution, and on-call crisis response
- Manage facility operations, budgeting, and community standards enforcement while maintaining academic performance

SKILLS

Programming & Tools: Python, Stata, SQL (PostgreSQL), Java, C++, Tableau, Microsoft Office Suite

Analytics: Regression Analysis (OLS, Logistic, Weighted), Econometrics, Hypothesis Testing, Data Visualization, Predictive Modeling

Database & SQL: Schema Design & Normalization, Stored Procedures & Functions, Query Optimization & Indexing, Transaction Management, ER Diagrams
